

Petrifilm®

Neogen® Petrifilm® Plates

Take our sustainability challenge

Are you still preparing agar dishes for microbial indicator testing? If so, you're missing a big opportunity to not only boost your lab's productivity and accuracy, but also help meet your company's sustainability goals. Petrifilm Plates can reduce your environmental impact over using agar plates in four key areas:

76%
Less energy

79%
Less water

75%
Less CHG
emissions

66%
Less waste

How many agar method tests do you perform per week?

Take the Petrifilm Plate Sustainability Challenge now! Just enter in the white box the number of agar plates you use for indicator testing in a typical week and hit "Calculate" to see how much more eco-friendly you can be with Petrifilm Plates. You might be in for a big surprise!

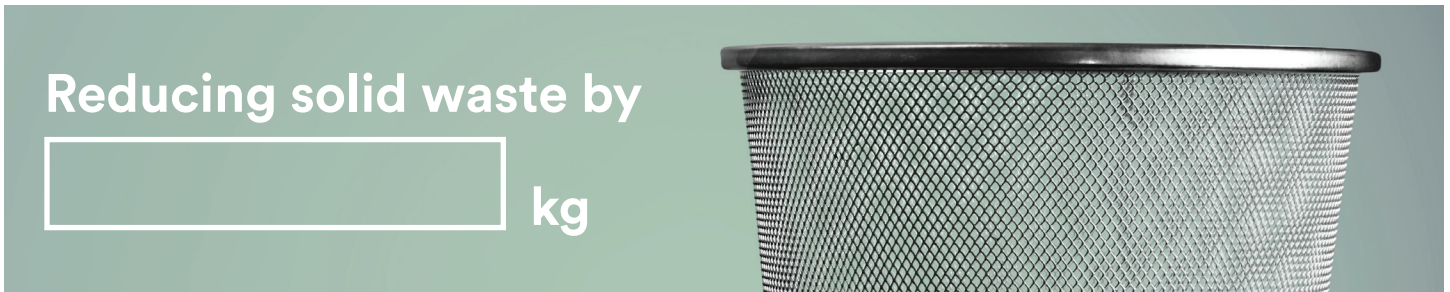

CALCULATE

Results*

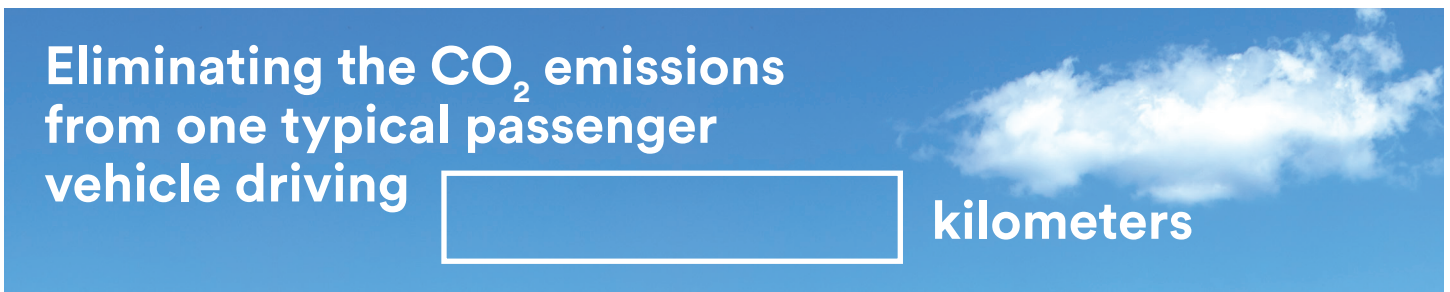

Based on the number of indicator tests you entered, these numbers show the positive impact you can have on the environment on an annual basis by using Petrifilm Plates instead of agar plates:

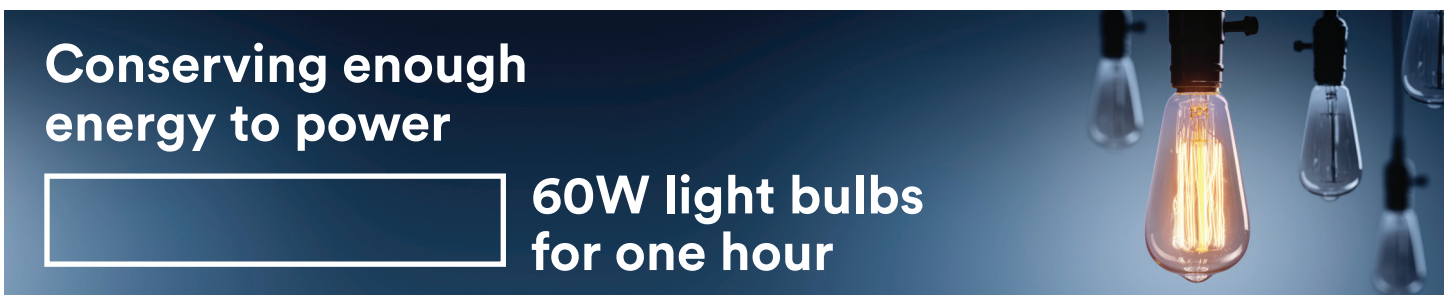

Saving liters of water

Reducing solid waste by kg

Eliminating the CO₂ emissions from one typical passenger vehicle driving kilometers

Conserving enough energy to power 60W light bulbs for one hour
