

Made to **DO MORE**

We've expanded what we can do — and now you can too.

How we can help you **DO MORE**

Our 2,500 employees are dedicated to enhancing global food security through improved food safety, animal safety, and increased output via genomics. Whether it's on the farm, in processing facilities, laboratories, or anywhere else, we're the partner you need to do more.

Comprehensive Food Safety Solutions

Indicator Organism Testing *Petrifilm® Plates and Petrifilm® Plate Reader Advanced*

Streamline your testing with ready-to-use plates that require no prep. Quickly and accurately enumerate plates in six seconds or less.

Microbial Detection *Soleris® Automated Testing*

Get fast and reliable detection of microorganisms including TVC, yeasts and molds, *Enterobacteriaceae*, *E. coli*, coliforms, and many others.

Culture Media

Our range of dehydrated culture media formulations include chromogenic agars and proprietary formulations that enable our sensitive One Broth One Plate alternative workflows.

Hygiene Monitoring

Our handheld hygiene monitoring solutions let you quickly verify cleaning effectiveness and capture, store, and manage data.

Pathogen Detection

Pathogen detection tests that are designed to fit a variety of testing needs. Food safety and contract labs can get confident answers quickly, with same-day or next-day results.

Allergen Testing

Qualitative and quantitative testing solutions that are designed to detect allergens in a wide variety of sample types and be used as part of your allergen control plan.

DO MORE with confidence

Our dedicated global network of over 300 food safety and technical experts are here to help you. We also have educational resources and support teams to keep you up and running.

DO MORE with proven solutions

From environmental monitoring to data analysis and everything in between, our solutions keep your organization at the forefront of food safety and quality.

DO MORE around the world

Our global footprint means we're able to meet you commercially or technically in local language while being mindful of your local regulatory requirements.

Food Quality Analysis

Enhance your food quality assessments with Megazyme advanced enzymatic solutions.

Natural Toxin Testing

Test for natural toxins with solutions designed to deliver fast and accurate results.

UHT/ESL Testing

Rapidly test a wide variety of UHT and ESL beverages such as juices, caffeinated drinks, coconut waters, dairy, and more.

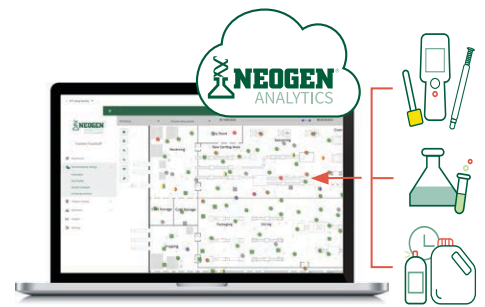

Sample Collection

Better testing begins with better samples. Choose intuitive and easy-to-use sample collection products that help streamline processes from start to finish.

Genomics

Our sophisticated genetic analytics and ISO and CLIA certification allows researchers and businesses to consider what can be possible for genetic testing in humans.

Neogen® Analytics

Streamline and help optimize product testing, environmental sampling, and sanitation workflows while transforming your data into actionable information.

Limited availability, check with your representative for more information.

Fueling the Future of Food Safety.

At Neogen®, we've added to what we can do with more innovative products and food safety expertise to help make your lab more efficient. We've also invested in analytical capabilities to give you more valuable data for actionable insights. We've built and acquired new production and distribution facilities and expanded into more than 140 countries — all so you'll have more access to the products and services you need.
