

Date: August 24, 2023

CHANGE NOTIFICATION

Effective Date: Starting September 2023

Process Affected: Accessibility of 3M™ Food Safety Certificates of Analysis, Calibration or Conformance, and Product Technical Literature

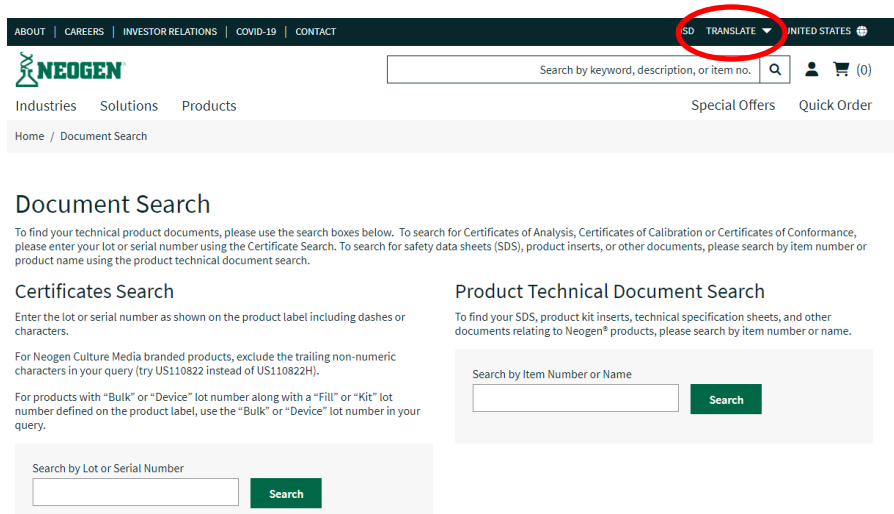

Dear valued customer,

From September 2023 to February 2024, with dates varying by country, you will notice your 3M Food Safety resources redirecting to Neogen® digital spaces. Including but not limited to Certificates of Analysis, Certificates of Calibration, Certificates of Conformance, Safety Data Sheets, product instructions, technical specification sheets, and other documents supporting the 3M Food Safety products will be available on the Neogen website via the document search. <https://www.neogen.com/document-search>. Access to these documents on the 3M website will end during this transition and you will be redirected to the Neogen website for access and support going forward.

If you need the web page content to be in your language, select the TRANSLATE button and then scroll and select your language.

For certificates, please refer to the directions under the Certificates Search section and simply enter the lot number of the item into the “Certificates” search field to retrieve the certificate.

For technical documents, simply enter the item number or product name into the “Product Technical Document” search field to access the list of available technical documents and then click on the link for the applicable document.

If you have any questions, please contact your Neogen representative.

Sincerely,

Mari-Sue Ratliff
Senior Director, Quality Systems
