- Acute toxicant
- Bromethalin attacks the central nervous system
- Provides a lethal dose to rodents in a single feeding
- First dead rodents appear within 2 days
- Establishes control in high infestation areas
- Controls rats and mice

Product Description

Gnavex Bait Blocks

Contains bromethalin, a highly potent neurotoxin rodenticide that provides a lethal dose to Norway rats, roof rats, and house mice in a single feeding. Bait blocks are weather resistant and can be used in wet or dry areas. They also contain a bittering agent. May only be used in and within 100 feet of man-made structures.

Gnavex Rodenticide Bait

A palatable bait containing bromethalin. Used for effective control of Norway rats, roof rats, and house mice in a single feeding. Includes grains and is a good option when alternate feed sources are available. May only be used in and within 100 feet of man-made structures.

Gnavex Refillable Mouse Stations

Contains one refillable bait station and Gnavex blocks. Effective indoor and outdoor control against anticoagulant-resistant house mice within 50 feet of home or building. House mice usually consume a lethal dose in a single feeding.
